Sinan KARAKAYA

Seeking internship in software engineering

I am looking for a full-time internship in programming from January 29 to June 7 for my third year at EPITECH.

Education

3rd year student at EPITECH Rennes - IONIS Group

From September 2021 to 2026 **Ionis Epitech** Rennes
Valedictorian of the C pool of the 1st semester, GPA above 3.15/4.

Baccalauréat Science (Maths / Physique-Chimie / Maths Expertes)

From September 2018 to July 2021 **Lycée Anita Conti** Bruz
Awarded with honors.

Work experience

Fullstack/mobile software engineer

From July 2022 to December 2022 **Wildsense** Paris
ReactJS/NextJS/React Native and AdonisJS developer as part of the creation of tools allowing the monitoring of environmental restoration projects.

Skills

JavaScript / TypeScript, ReactJS, NextJS, React Native, AdonisJS

Mastery of different technologies related to React in the context of creating websites and mobile applications.

Mastery of the AdonisJS framework for creating web servers and REST APIs.

C, C++, C#, Bash, Java

Daily use of C and C++ as part of my studies and personal projects.

Use of Bash to create Linux scripts allowing the automation of certain tasks.

Docker, PostgreSQL, Ansible, Jenkins

Using Docker and PostgreSQL when creating web applications. Use of Ansible and Jenkins for automation purposes.

Git (Github, Gitlab...), Visual Studio Code, suite JetBrains

Daily use of these technologies as part of my studies and personal projects.

Personal projects

- World simulator in C++, client-server application
- Raytracer in C++/CUDA
- i18n library in C++
- "What's Here?" website allowing places to be shared between users
- Modification of NumWorks calculator OS
- Various CTFs organized by the army or PoC organization
